Subject: Announcement of the change in the Price list – RETELA, s.r.o.

Dear Clients,

On behalf of the collective scheme RETELA, s.r.o., I would like to inform you about the change of the Price list valid from 1 January 2027.

The reason for this adjustment is a significant increase of the costs connected to ensuring the take-back system and subsequent treatment of the collected electric and electronic devices.

We appreciate our cooperation and thank you for your expressed trust. Although our price list hasn't been significantly changed for long time, the current cost increase has forced us to make this responsible step.

The aim of this adjustment is to keep ability to ensure the fulfilment of all obligations according to the law and to maintain the level of the provided services for all producers cooperated with our collective scheme.

We would like to remind that the adjustment of recycling fees doesn't mean an increase in expenses for your company, because you have to state visibly and separately the recycling fees in the same amount (according to the law) in the invoices for your customers.

New recycling fees will be used for the devices imported from 1 January 2027.

We have to emphasize that starting with the report for Q1/2027 (in April 2027) there will be possibility to report exports only for EEE placed on market in 2027, except the group 4b (solar panels and their accessories), for which the recycling fees remain same.

The new price list valid from 1 January 2027 is attached to this letter.

Kind regards

Ing. Jaroslav Vladík, CSc.

CEO of the company RETELA, s.r.o.
